

APOGEE INDUSTRIES

If you can imagine it, we can engineer it

FASTTRACK™

Apogee aims to provide a service that can be tailored to suit you.

Accelerated orders of individual items and small scale production runs can be accommodated with our FastTrack services. A 24 hour turn around is guaranteed on each individual service

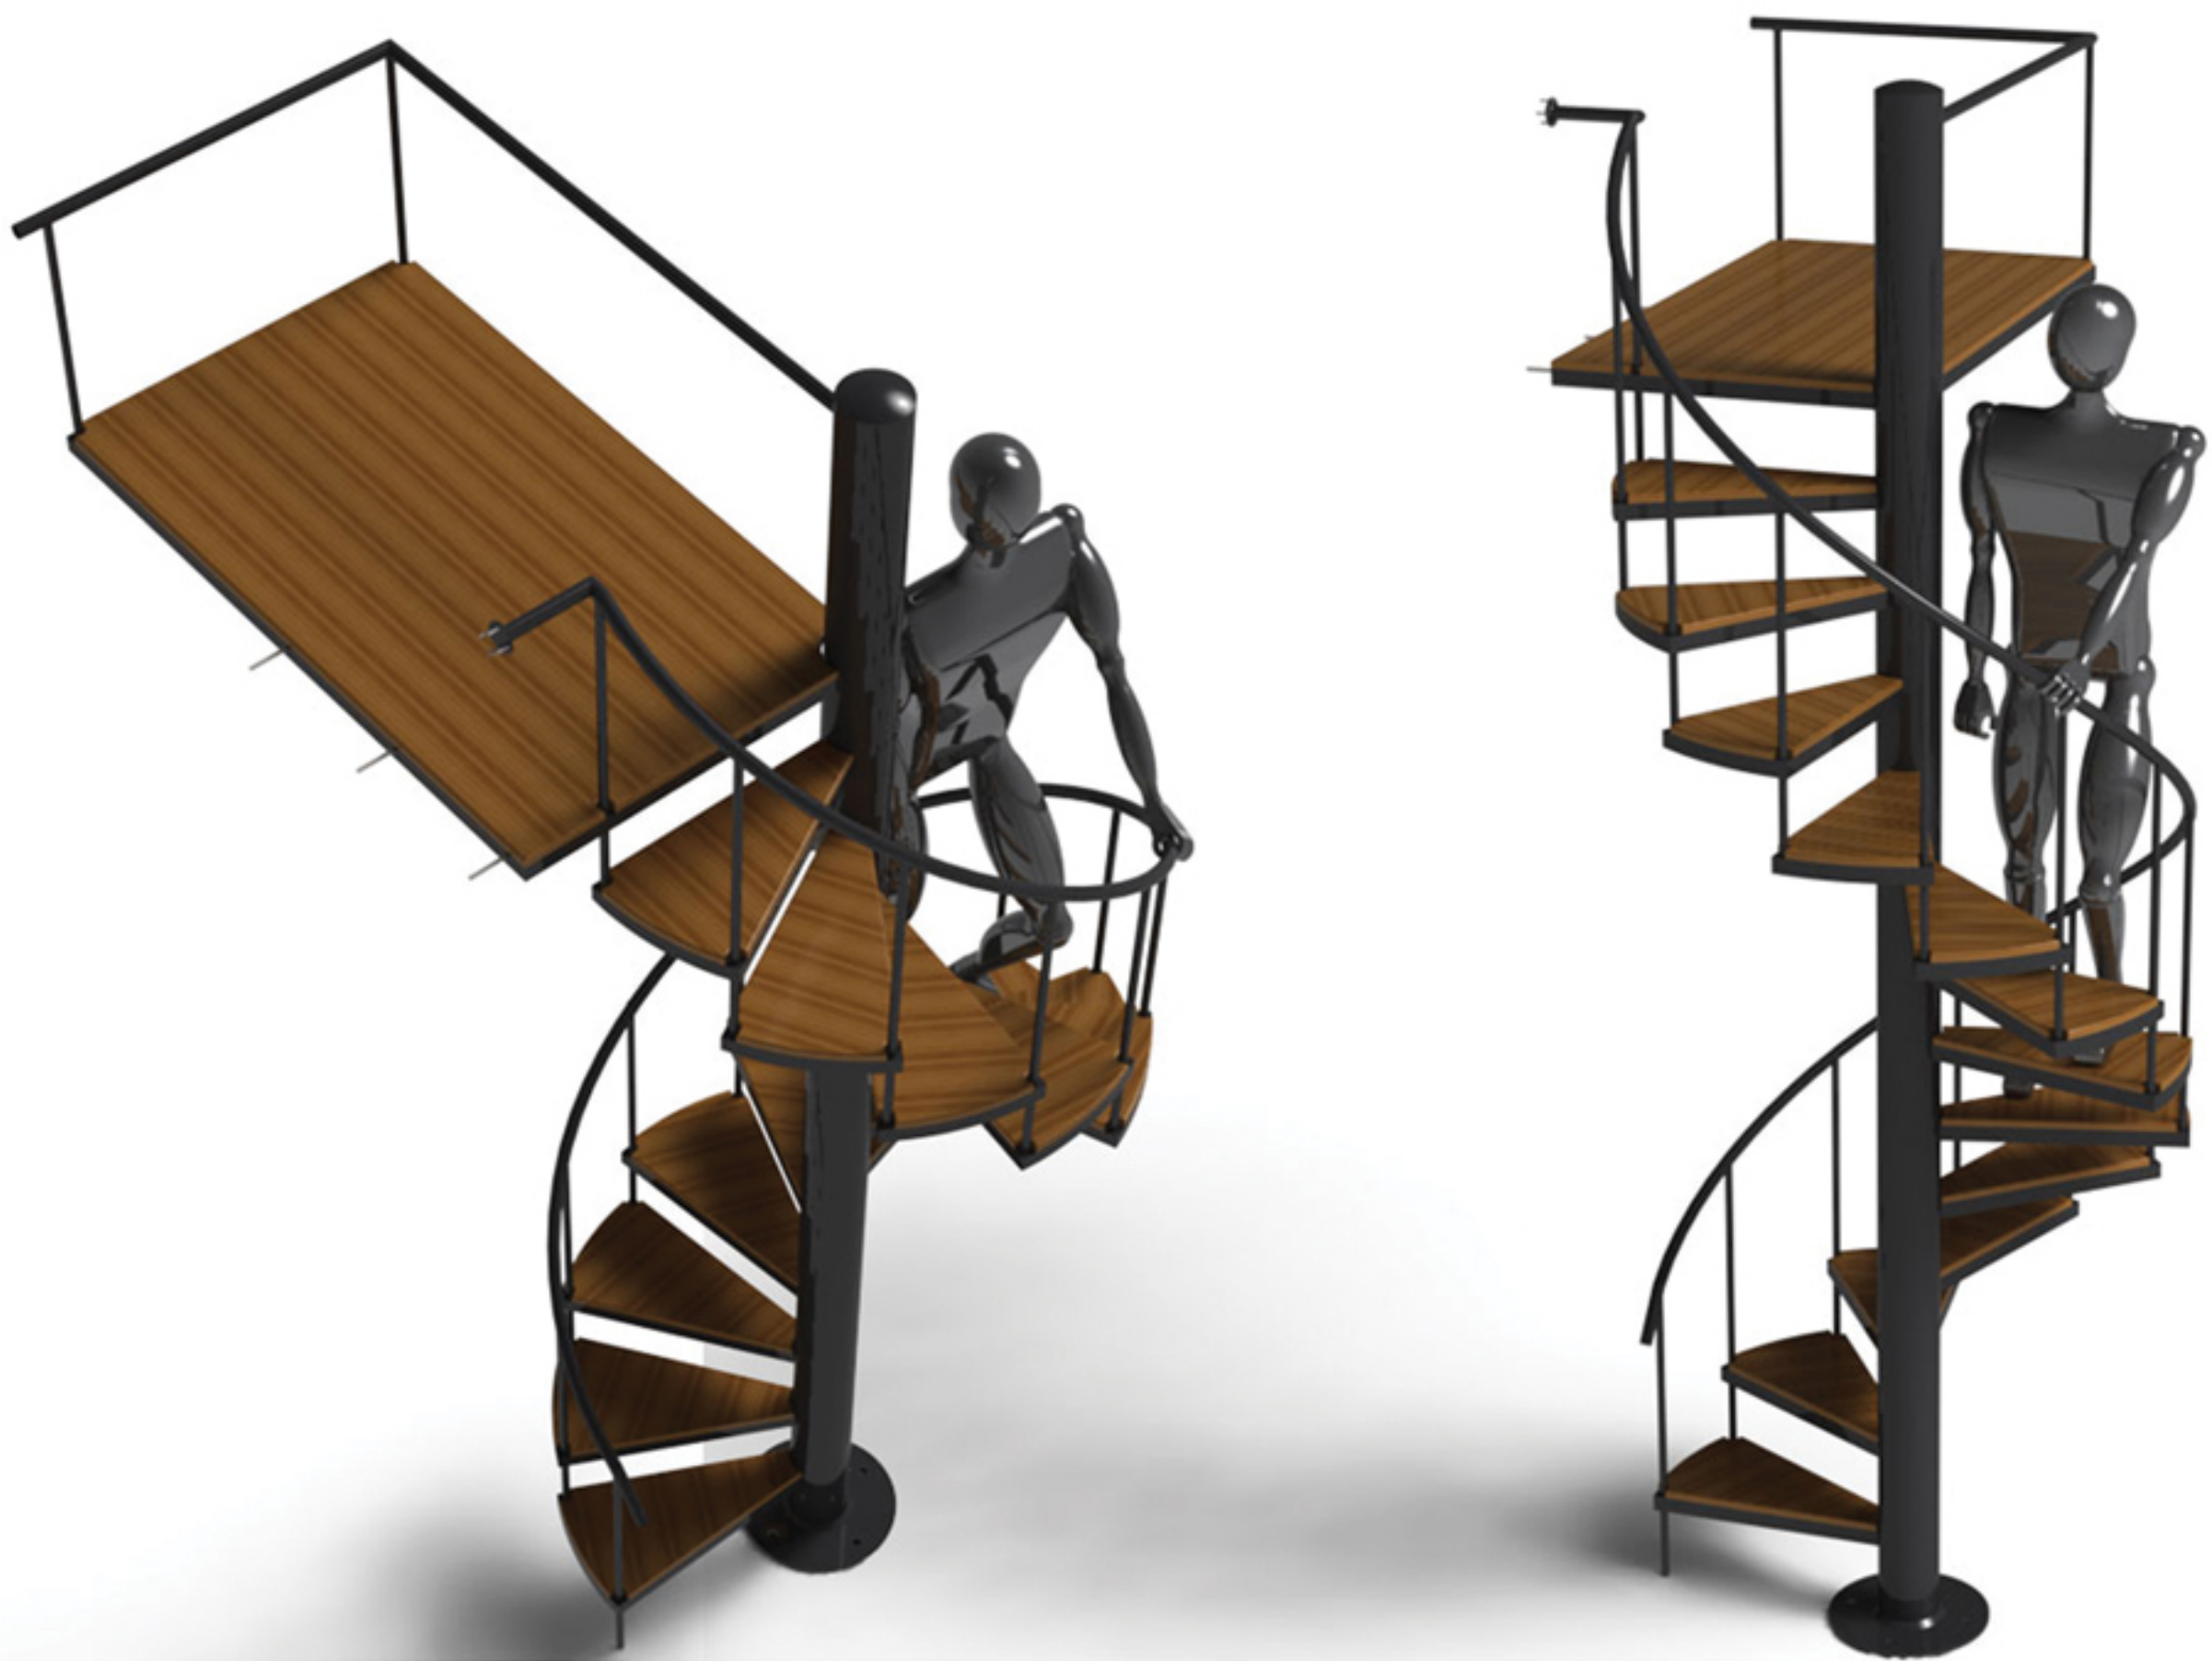

From a simple folded bracket to a complete fabricated assembly incorporating folding, rolling, welding, inserting, drilling and tapping. Post machining can also be accommodated at the required stage of manufacture.

With our FastDraw service you can progress from enquiry to initial CAD model in as little as 24 hours. Alternatively arrange a sit down consultation with one of our draughtsmen and progress with your product faster.

Using the latest 3D CAD software, drawing from a vast range of experience, we can work with you to create a practical and efficient solution for your project.

With our FastCut service you can progress from enquiry to a cut product in as little as 24 hours. Our modern highspeed laser with fully automatic FMS load and unload system allows us to pre-program, nest and cut multiple sheets in the most efficient way.

With our FastBend service you can have your FastCut products bent and ready for you in as little as 24 hours. Apogee provide a range of CNC bending and forming services using our library of standard and custom made tooling. Combine this with our FastWeld service to complete the production of your product.

With our FastWeld service you have your product or item welded within 24 hours either as a part of a FastTrack package or as a stand-alone item. We are able to weld and fuse most materials with various techniques. Polishing and finishing is included within this service.
